

WASTEWATER TREATMENT TECHNICIAN

POSITION SUMMARY

The Wastewater Treatment Technician is required to manage and maintain wastewater treatment units. The successful candidate will be responsible for conducting preventive maintenance, troubleshooting issues, and ensuring the effective operation of wastewater treatment systems.

KEY RESPONSIBILITIES

- Perform daily preventative maintenance checks on wastewater treatment units.
- Troubleshoot and repair treatment units to ensure proper functionality.
- Monitor and replenish consumables required for the efficient operation of treatment units.
- Conduct cleaning and sanitation of wastewater treatment units.
- Provide plumbing services to support maintenance, including work related to the potable water supply.
- Perform plumbing tasks that may not be directly related to wastewater treatment units as required.
- Other duties as assigned relating to the job.

QUALIFICATIONS, EXPERIENCE & SKILLS

- High School Education with passes in Mathematics and English (CSEC Level – CXC) required.
- Technical Certificate in Wastewater Treatment, Plumbing, or a related field preferred.
- Minimum 2 years of experience in wastewater treatment, plumbing, or maintenance services.
- Strong knowledge of wastewater treatment systems, plumbing repairs, and maintenance procedures.
- Ability to troubleshoot and repair mechanical and plumbing components efficiently.
- Familiarity with safety procedures and proper handling of wastewater treatment chemicals.
- Good communication and teamwork skills.
- Physically fit and capable of performing hands-on maintenance work in an industrial environment.

ADDITIONAL REQUIREMENTS

- Willingness to work in an industrial setting with varying conditions.
- Ability to work flexible hours when necessary to support maintenance schedules.
- Valid certification or training in banksman duties is an asset.
